Make data speak to you

# Inspect&Trace, the complete solution to elevate your quality standards.

Customize and conduct real-time inspections to proactively manage quality, and strengthen the integrity of your supply chain. With Inspect&Trace, seize control of your quality processes and ensure the success of your business.

Explore the use cases where Inspect&Trace can optimize your quality control operations:

Prevention of incorrect product shipments

Review product conditions prior to shipment, and include necessary documentation to confirm timely and accurate delivery. Additionally, access tailored reports specific to your operations.

Yard operations management

Efficiently register units for loading and unloading, inspect their conditions, and receive automated reports on any issues for prompt resolution, along with accessible result dashboards via the platform.

Compliance with the 17 CTPAT points

Conduct inspections in accordance with the 17 points outlined by CTPAT, maintaining photographic evidence and providing real-time access to results for your team and suppliers, if required.

Periodic facility inspections

Customize facility inspection schedules, outlining key areas for review and their criticality levels. Maintain a photographic record and ensure auditability and integrity of records on the platform.

Receipt and inspection of farm production by intermediaries

Effectively manage and inspect product receipts, classify defects, and track payment negotiations with producers based on inspection results.

Review of tariff classifications at customs agencies

Utilize a dynamic mathematical model for inspections, identifying tariff classifications that require mandatory inspection and those dependent on client history.

Schedule your demo today to unlock the full range of benefits Inspect&Trace has to offer.
